Re-Teach

1.
Solve for x: $x + 7 = 15$
2.
Solve for y: $y - 4 = 11$
3.
Solve for n: $3n = 21$
4.
Solve for a: $a / 5 = 6$
5.
Solve for m: $8 + m = 17$

Consolidate

1.
Solve for x: $2x + 5 = 17$
2.
Solve for y: $3y - 7 = 14$
3.
Solve for n: $n/4 + 3 = 8$
4.
Solve for a: $12 - 2a = 4$
5.
Solve for m: $5m + 8 = 33$

Master

1.
Solve for x: $2(x + 3) = 16$
2.
Solve for y: $4(2y - 1) = 20$
3.
Solve for n: $3(n + 5) = 2(n + 10)$
4.
Solve for a: $5(a - 2) = 3(a + 4)$
5.
Solve for m: $2(3m + 1) - 4 = 10$
