

# ADDITION AND SUBTRACTION OF INTEGERS

The purpose of this homework is to reinforce your understanding of adding and subtracting positive and negative whole numbers.

To Know: How to apply rules for combining integers with opposite signs and handle subtraction as adding the additive inverse.

To Remember: The concept of absolute value and that subtracting a negative number is equivalent to adding its positive counterpart.

Example: Calculate  $8 + (-5) - (-3)$

Watch the video on the worksheet if you are unsure of how to complete any of the work.
